Importance: High

Jason –

I discussed with Kelly Zito this morning and she asked me to follow up with you to see if we could put together a short written response to respond to Nick Matiella's follow up inquiry regarding next steps for Rosemont if they wish to provide additional information to EPA as well as a request to lay out the timing for how this would work. (See Nick's bolded text I highlighted in red in message below).

Nick -

I am checking in with colleagues regarding your questions and will follow up with you once I hear back from them. I will be out of the office on Friday on annual leave, so I may not be able to follow up with you until Monday.. In my absence, David Yogi, will be backing me up on Friday and he can be reached at 415.972.3350.

Regards,

Brent

Thanks Brent. On November 23, it was reported in the Arizona press that EPA has determined that Rosemont's proposed 404 mitigation activities would be insufficient. **What's the next step for Rosemont if they want to rebut or provide additional information to EPA and USACE? Can you lay out the timing for how this would work?**

Nick -

As a follow up to your recent inquiry regarding Rosemont Mine, please find some information and links that you may find of interest.

Rosemont Copper Mine Project – December 3, 2013

The Rosemont Copper Mine Project is a proposed copper mine operation on approximately 4,750 acres predominantly on Coronado National Forest lands southeast of Tucson, Arizona.

The United States Forest Service is the lead federal agency for preparing an Environmental Impact Statement (EIS) under the National Environmental Policy Act (NEPA). In February 2012, EPA rated the Draft EIS “EU-3 – Environmentally Unsatisfactory-Inadequate Information.”

The Forest Service posted their Final EIS on the Rosemont project website on November 29, 2013.

<http://www.rosemonteis.us/final-eis>

For more information about the NEPA review process, a database of environmental impact statements prepared by federal agencies and EPA’s comments concerning the EISs, see this link:

<http://www.epa.gov/compliance/nepa/>

The project will also require a Clean Water Act Section 404 permit issued by the U.S. Army Corps of Engineers. Please see these links for further information regarding EPA and USACE roles in the 404 permit process.
